PROFESSIONAL PROFILE

Product-minded developer who delivers **web, mobile, desktop, and business software** from data model and API through polished UI and deployment. Hands-on experience spans e-commerce, payments, operational dashboards, realtime systems, and workflow automation. Brings an unusual combination of engineering ownership and former service operations leadership—translating business needs into reliable, maintainable products.

DATA, CLOUD & DELIVERY

PostgreSQL · Supabase · Firebase · Redis · Cloudflare · CI/CD

PROFESSIONAL EXPERIENCE

- 

Full Stack Developer Sep 2025 — Jan 2026
Van Piliç · Food retail & commerce
 - › Delivered a production commerce experience spanning product catalogue, cart, order tracking, customer flows, and operational admin tooling.
 - › Implemented phone verification, 3D Secure payments, PDF receipts, and backend data flows; supported release to Google Play.
- 

Full Stack Developer Aug 2024 — Nov 2024
Wrench Garage · Automotive service technology
 - › Designed and shipped an AI-assisted service tracking and fleet management system with realtime job status and invoicing workflows.
 - › Centralised maintenance history, reminders, and reporting to reduce dropped work and duplicated communication.
- 

Assistant Chief of Service Jun 2022 — Aug 2024
Schindler · Elevators & escalators
 - › Coordinated maintenance crews, scheduling, stakeholder communication, and safety and compliance follow-through in a service-critical environment.
 - › Developed an SLA-minded approach to prioritisation, incident handling, ownership, and clear communication across teams.
- 

Independent Software Developer Feb 2018 — Present
Freelance engagements & proprietary products
 - › Build end-to-end products for e-commerce, accounting, CRM, automotive, property, and corporate use cases across web, mobile, and desktop.

Selected Product Work

BUSINESS SYSTEMS · COMMERCE · MOBILE · REALTIME

COMMERCE & OPERATIONS

ÇiçekSepetim Product Suite

[Next.js](#) · [NestJS](#) · [Prisma](#) · [Redis](#) · [.NET WPF](#) · [PostgreSQL](#)

Built a multi-product suite covering e-commerce and admin, vehicle reservation and lead management, plus desktop accounting and HR workflows with role-based controls and audit history.

MOBILE COMMERCE

Van Piliç / KasapApp

[Flutter](#) · [Supabase](#) · [3D Secure](#) · [PDF](#) · [Google Play](#)

Delivered customer and store workflows for food retail, including catalogue, cart, orders, phone verification, payment processing, receipt generation, and administration.

[View on Google Play](#) →

SALES OPERATIONS

Student CRM

[React](#) · [Supabase](#) · [Cloudflare](#) · [Realtime](#)

Created an MVP with authentication, client chat, deal pipeline, ownership rules, and manager reassignment flows for a sales organisation.

[View source on GitHub](#) →

PROPERTY MARKETPLACE

KampusEv

[Next.js](#) · [TypeScript](#) · [Tailwind CSS](#)

Built a student housing and roommate marketplace with listing filters, detail pages, ad creation, saved listings, and support for external data integration.

CORPORATE PLATFORMS

DTL Software & Baromer

[JavaScript](#) · [Spring Boot](#) · [Thymeleaf](#) · [JPA](#)

Delivered corporate web presences and lead flows for software, mining, and construction businesses, including project showcases and backend form handling.

[DTL Software](#) · [Baromer](#)

ENGINEERING & GAME SYSTEMS

DailyFix & NanoCity Tycoon

[JavaScript](#) · [Technical writing](#) · [Unity](#) · [C#](#)

Publish researched fixes for recurring developer problems while building a mobile-first city tycoon with grid placement, resource economy, boosts, and save systems.
