SUMMARY

Full-stack developer building production web applications, automation, and admin tooling for operating businesses. Combines hands-on engineering with prior operations leadership in elevator and escalator service coordination, comfortable owning delivery end-to-end: data model, API, UI, and deployment. Seeking roles in Türkiye, Europe, and remote-first teams where pragmatic problem solving and maintainable systems matter.

ATS / KEYWORD SUMMARY

JavaScript, TypeScript, Python, C#, SQL, REST API, SPA, full-stack development, MySQL, PostgreSQL, admin dashboard, authentication, workflows, Git, CI-friendly delivery, Firebase, e-commerce, operational tooling, AI-assisted features, stakeholder management, SLA mindset.

CORE SKILLS

- JavaScript / TypeScript · Python · C# · SQL
- Full-stack web apps (SPA + server APIs)
- REST APIs · admin panels · auth & workflows
- MySQL · PostgreSQL
- Workflow automation · operational tooling
- AI-assisted features (integrated responsibly)
- Git / Git hosting · iterative delivery
- Firebase basics · cloud-ready mindset

Languages: Turkish (native) · English (professional working proficiency)

EXPERIENCE

Full Stack Developer

Sep 2025 — Jan 2026

Vanpilic — food industry

- Delivered an end-to-end food ordering web platform: catalogue, basket, fulfilment-facing flows, order tracking, and a complete admin and dashboard layer.
- Prioritized reliable UX for daily operations teams and clearer customer journeys.

Full Stack Developer

Aug 2024 — Nov 2024

Wrench Garage — automotive services

- Designed and shipped an AI-assisted service tracking and fleet management system.
- Maintenance history, reminders, and reporting to reduce dropped work and duplicated communication.

Assistant Chief of Service

Jun 2022 — Aug 2024

Schindler — elevators & escalators

- Ran coordination for maintenance crews, scheduling, stakeholder communication, and safety and compliance follow-through.
- Strong parallel to software roles: stakeholder management, SLA-style thinking, and incident-style prioritisation.

Freelance & proprietary products

Feb 2018 — present

DTL Cyprus — business workflows & digital presence — dtlsoftware.com

Kıbrıs Çiçek Dünyası — multi-language floral e-commerce — kibriscicekdnyasi.com

Baromer — baromer.com

Van Pilic — mobile companion — digital ordering and lightweight customer tooling for food operations — [Google Play](#)

EDUCATION

Self-directed learning · software & game development 2018 — present

Deep practice through shipped web products, tooling, and game prototypes (Unity), complementing classroom-style study with production experience.

CERTIFICATIONS

METU Game Jam — participation certificate

Rapid prototyping, teamwork, and time-boxed shipping under competitive conditions (Middle East Technical University).
